

How to search for standards

When searching for standards, please go to <http://www.volvo.com/suppliers/global/en-gb/supplierapplication/standardsaccess/searchstdnew.htm> and following the instructions below.

When searching for a standard, omit the prefix (STD, VCS etc.) and only enter the digits.

To find a specific language version, add a suffix (-sv, -en, -fr, -kor, see table below). Many Volvo standards are English/Swedish bilingual and do not require a suffix.

Company:	Prefix + standards number designation:	Example:
Volvo Group	<ul style="list-style-type: none"> • STD <3 digits>-<4 digits> • STD <4 digits>,<1-5 digits> 	100-0002 5051,16
	For more information on how to search for Renault Trucks and Mack Trucks standards, see information below.	
	Language versions - For Korean language version: add "kor" after the number. - For French language version: add "fr" after the number. - For Swedish-only version: add "sv" after the number.	100-0002kor 101-0001fr 112-0003sv
Volvo Cars	<ul style="list-style-type: none"> • VCS <4 digits>,<1-5 digits> • STD <4 digits>,<1-5 digits> 	5023,509 1006,601 ¹⁾
	<ul style="list-style-type: none"> • VCE <4-5 digits>,<1-5 digits> • IND <4-5 digits>,<1-5 digits> • VBM <4-5 digits>,<1-5 digits> 	27412,201 5080,311 5021,341kor
Renault Trucks	Standard references shall be stated without any separator between the numbers.	
	English / French versions For English version, add "en" after the number For French version: add "fr" after the number	00104501en 00104501fr
	Searching for Test Methods When searching for Test Methods do not include the "RT" prefix but make sure that the "D" prefix <i>is</i> entered in the search box.	
	Example To find document RT D30 1769 in English.	d301769
Mack Trucks	Enter the complete GS number.	014gs16034

1) When STD standards are revised, they are replaced by a VCS version of the standard (to be used by Volvo Cars).

Documents missing?

Send an e-mail to CorporateStandards@volvo.com if the standards you are searching for is not available.

Material numbers

If you are searching for a material standard, please note that the material number is not the same as the standard number. On the search page for standards you can find our conversion lists for metallic/non-metallic materials. These will help you find the standards document number if you only have the material number/designation. If they cannot answer your questions, send an e-mail to CorporateStandards@volvo.com and indicate which material number you are searching for and from which document the reference is made.

Calibration Instructions (KAL) documents

Enter the STD and KAL prefixes, for example STD KAL 610.10

ISO standards, EN standards, IEC standards, and other national or international standards

These standards have to be purchased from the standards organization issuing the standards, your national standards organization or a company specializing in selling these types of standards. See, for example, <http://www.wssn.net/WSSN/> for more information on national and international standardization.
