CEO'S COMMENTS

Continued profit improvement and strong cash flow

The Volvo Group increased both sales and profitability during the second quarter. Compared with the second quarter last year, net sales increased by 12% and amounted to SEK 88.4 billion. The profitability continued to develop positively with an adjusted operating income of SEK 8.5 billion (6.1), which corresponds to an operating margin of 9.7% (7.8). All our business areas improved their operating income. Cash flow in the Industrial Operations was also strong and amounted to SEK 11.9 billion (6.9).

The service business continued to develop favorably and grew by 3% compared with the same quarter last year on a currency adjusted basis. We continue to increase our focus on selling complete solutions combining products with services and financing to our customers.

Recent trends on the truck markets continue with good demand in Europe, including a distinct recovery in Russia, and a gradual improvement in North and South America, with increased order intake. In Europe, Renault Trucks has improved its market share and Volvo Trucks kept its historically high share while growing it in Russia.

Total truck deliveries were down 1% in the quarter driven by lower deliveries in North America. The adjusted operating margin was 9.6%, with the quarter being negatively affected by a stretched supply chain.

Our competitive trucks continue to make their mark in the industry. Volvo Trucks and Renault Trucks came in first and second place in the "Young Professionals Truck Award 2017", which is based on test driving by young truck drivers in Germany.

In North America we took a very important step in July with the announcement of the new Volvo VNL series. It is a groundbreaking long-haul tractor with cutting-edge innovations in fuel efficiency, driver productivity, safety and connectivity solutions to maximize uptime. The truck features a new cab with improved aerodynamics and interior, including an all-new, 70-inch sleeper. Together with the Volvo VNR for regional haul, which was announced in April, Volvo will have a product program in North America that is the strongest ever. The new trucks will be ramped-up in production gradually during the second half of 2017.

Following the introduction in the first quarter, UD Trucks new heavy-duty and medium-duty truck series with associated services are now launched in an increasing number of markets. Most recently at a major customer event with UD Croner in Dubai. The new trucks strengthen the Group's competitiveness in Japan as well as in emerging markets in Asia and other parts of the world. We see good progress for UD Trucks in Japan, where market share has recovered to 17.8% (16.5).

Demand for construction equipment continues to improve in Europe and China, and also with a clear recovery in the

mining segment in many parts of the world. Volvo CE's sales increased by 36% compared to a year ago and amounted to SEK 18.5 billion. Thanks to Volvo CE working intensively to reduce its cost base and keeping tight control over costs now as volumes return, the increased sales has resulted in a significant improvement in profitability with an adjusted operating margin of 13.3%.

In general Volvo CE has very competitive products and services with good positions in key markets and segments. We will continue to drive the transformation program that focuses on core products and segments, continuous improvement, improved quality and reduced costs.

Volvo Buses' profitability was stable with an adjusted operating margin of 4.6%. During the quarter Volvo Buses secured a frame agreement for 360 Prevost coaches to Greyhound/First Group, the largest order to date in North America.

In the seasonally strong second quarter, not least on the marine side, Volvo Penta's sales increased by 15% and they generated an adjusted operating margin of 15.5%. The positive development with good growth also applies to industrial engines, where Volvo Penta is currently investing to further strengthen their customer offering. In July, Volvo Penta made a move in to the segment for outboard engines when they acquired a majority in the US-based, innovative outboard engine manufacturer Seven Marine.

Volvo Financial Services continued to have a good return on equity with low credit losses. Financial services are a very important part of our complete solutions offer and they deepen the relationship with our customers.

We have a clear strategy on how to improve the Volvo Group's profitability and grow the service business while we continue to invest in new technologies. We have strong, Group-wide assets that business areas can utilize. At the same time, we are in the process of decentralizing responsibility and creating value chains that are more regional to drive accountability, simplicity and speed to better manage changes in demand. But above all, we are building a culture where continuous improvement is the guiding principle to better serve our customers.

Martin Lundstedt
President and CEO

FINANCIAL SUMMARY OF THE SECOND QUARTER 2017

Net sales

In Q2 2017, the Volvo Group's net sales increased by 12% to SEK 88,409 M. Adjusted for currency movements and acquired and divested operations, net sales increased by 6%.

Vehicle sales increased by 7% adjusted for currency movements. The increase was primarily an effect of good demand for the Group's products in Europe and Asia. This was partly offset by lower truck volumes in North America. Adjusted for currency movements, service sales increased by 3%, reflecting higher utilization of customer fleets.

Operating income

Adjusted operating income in Q2 2017 amounted to SEK 8,540 M (6,130), corresponding to an operating margin of 9.7% (7.8). There were no adjustments in Q2 2017. The

adjustment in Q2 2016 referred to a provision of SEK 2,334 M related to the EU competition investigation.

Compared with Q2 2016, the higher adjusted operating income is primarily an effect of significantly improved earnings in Volvo CE as well as a higher gross margin on services and a favorable product mix in Trucks. This was partly offset by higher selling and administrative costs, higher costs for R&D as a result of lower capitalization (net effect of SEK 398 M compared to Q2 2016) and costs related to a stretched supply chain. Favorable currency movements compared to Q2 2016 had a positive impact of SEK 350 M.

Earnings in Volvo CE in Q2 2016 included costs of SEK 176 M for credit losses in China.

Reported operating income in Q2 2017 amounted to SEK 8,540 M (3,796).

Financial items

Compared with Q2 2016 interest income decreased by SEK 25 M while interest expenses increased by SEK 58 M.

In Q2 2017 other financial income and expenses amounted to SEK -59 M (32).

Income taxes

In Q2 2017 the tax expense amounted to SEK 2,019 M (1,462) corresponding to a tax rate of 25%.

Income for the period and earnings per share

In Q2 2017 income for the period amounted to SEK 6,004 M (1,991). Diluted earnings per share amounted to SEK 2.91 (0.97).

Operating cash flow in the Industrial Operations

In Q2 2017, operating cash flow in the Industrial Operations was positive in an amount of SEK 11.9 billion (6.9). The improved cash flow is primarily related to the higher operating income of SEK 8.0 billion and a SEK 3.6 billion reduction in working capital.

Volvo Group financial position

During the second quarter net financial assets in the Industrial Operations, excluding provisions for post-employment benefits increased by SEK 4.7 billion, resulting in a net financial asset position of SEK 5.0 billion on June 30, 2017. This equals to 5.6 % of shareholders equity.

Including provisions for post-employment benefits, the Industrial Operation is in a net financial debt position of SEK 7.5 billion corresponding to -8.4% of shareholders' equity. The change is mainly explained by a positive operating cash flow of SEK 11.9 billion, remeasurements of the defined benefit obligations of SEK 0.7 billion, reduced by the dividend paid to AB Volvo shareholders of SEK 6.6 billion. The decrease in the defined benefit obligations is mainly explained by high return on investment leading to increased pension asset value. During the second quarter the currency movements decreased the net financial position by SEK 1.4 billion.

On June 30, 2017 the shareholders' equity for the Volvo Group amounted to SEK 100.3 billion compared to SEK 97.8 billion at year-end 2016. The equity ratio was 25.1% (24.5). On the same date the equity ratio in the Industrial Operations amounted to 30.6% (30.9).

On June 30, 2017 S&P upgraded its long-term credit rating for the Volvo Group from BBB to BBB+ with stable outlook.

Number of employees

At the end of the second quarter the Volvo Group had 98,983 employees, including temporary employees and consultants, which was an increase of 1,693 employees compared with June 30, 2016. The number of blue-collar employees increased by 1,662 and the number of white-collar employees increased by 31.

TRUCKS

Stable earnings

- » Demand in Europe remains high, pick-up in orders in North and South America
- » Adjusted operating income SEK 5,417 M (5,222) corresponding to an operating margin of 9.6% (10.0).
- » Important product launch by Volvo Trucks in North America

Market development

The truck market in Europe remained strong in Q2 2017. Demand for transport continued to be good, resulting in high capacity utilization for truck fleets and good customer profitability, leading to continued renewal and expansion of fleets. For 2017, demand for heavy-duty trucks in Europe is expected to remain on about the same high level as in 2016. Demand in Russia is growing as a consequence of the need to renew fleets.

In North America the highway segment is still characterized by over-capacity due to the underutilized population of used long-haulage trucks. However, regional distribution is showing signs of higher activity and construction segment continues to perform well. Heavy-duty truck industry orders increased during Q2 2017. The total market forecast for retail sales

volumes is modestly upgraded to 225,000 trucks for the full year 2017.

In the first six months registrations of heavy-duty trucks in Brazil declined by 13% from already low levels. The market seems to be bottoming out with some signs of improving order activity.

In India, registrations of heavy-duty trucks decreased by 9% as the market slowed down following the introduction of new emission regulations on April 1.

Registrations in the Chinese heavy-duty truck market increased by 72%. The increase is reflecting a good freight environment and higher construction activity. The total market forecast has been increased to 880,000.

In Japan, the market remains on good levels and demand for 2017 is expected to be similar as in 2016.

Orders and deliveries

Truck deliveries declined by 1% to 52,058 vehicles in Q2 2017. Net orders in the quarter increased by 22% to 55,265 trucks, driven by a broad-based increase across all regions.

Deliveries of heavy-duty and medium-duty trucks in Europe increased by 7% to 23,553, while orders increased by 11% to 23,347 trucks. Orders for Renault Trucks' light-duty trucks increased by 53%, primarily as a consequence of all models now being available for sale with Euro 6 step C engines. Through May, Volvo Trucks' market share for heavy duty

trucks in Europe was stable at 16.9% (17.0), while Renault Trucks' increased its market share in heavy-duty to 8.3% (7.9).

In North America, deliveries were down 11%. Volvo Trucks' market share came in lower at 8.8% (9.6) while Mack gained market shares reaching 8.2% (7.9). The order intake increase of 30% was driven by both Mack and Volvo reflecting the higher activity within the construction segment and a somewhat improved freight environment.

Deliveries in South America increased slightly in Q2 2017. Volvo Trucks' heavy duty market share in Brazil declined somewhat and reached 18.1% (19.2) for the first six months. Order intake in South America increased by 129% from very low levels. Some customers in Brazil are renewing their fleets, despite the uncertain economic conditions. Demand outside Brazil continues to be good.

In Asia, truck deliveries remained rather flat in the quarter. Through June, UD Trucks increased its heavy duty market share in Japan to 17.8% (16.5). Orders in Asia increased by 3%.

Net sales and operating income

The truck operation's net sales amounted to SEK 56,366 M in Q2 2017, which was 8% higher than in Q2 2016. Adjusted for currency movements, net sales increased by 2%, with sales of vehicles increasing by 2% and service sales increasing by 1%.

Adjusted operating income in Q2 2017 amounted to SEK 5,417 M (5,222) corresponding to an operating margin of 9.6% (10.0). There were no adjustments in Q2 2017. Adjustments in Q2 2016 referred to a provision for the EU competition investigation of SEK 2,334 M. Reported operating income amounted to SEK 5,417 M (2,888).

Compared to Q2 2016, the adjusted operating income was positively impacted by higher gross margin in services, favorable product mix and higher earnings in the JV's. This was partly offset by higher selling and administrative costs, higher R&D costs as a consequence of lower capitalization and costs related to a stretched supply chain. Compared with Q2 2016, currency movements had a positive impact of SEK 276 M.

Important events

In North America a very important step was taken in July with the announcement of the new Volvo VNL series. It is a groundbreaking tractor with cutting-edge innovations in fuel efficiency, driver productivity, safety and uptime. The new truck features a new cab with improved aerodynamics and interior, including an all-new 70-inch sleeper. Together with the Volvo VNR, developed for regional haul that was announced in April, Volvo Trucks will have a product program in North America that is the strongest ever. The new trucks will be ramped-up in production gradually during the second half of 2017.

The Volvo FH Performance Edition truck was announced winner of the "Young Professionals Truck Award 2017", based on test driving by young truck drivers in Germany. The award was part of the "Best Commercial Vehicles 2017" event in Ludwigsburg. Renault Trucks T High Edition came in at second place.

CONSTRUCTION EQUIPMENT

Strong earnings

- » Transformation program yielding results
- » Adjusted operating income SEK 2,460 M (810) and operating margin 13.3% (5.9)
- » Most major markets showing increase in demand; Chinese market recovery

Volvo machines at work on Sulawesi in Indonesia.

Market development

The European market was up by 14% as of May, driven by growth in all major markets including Germany, the UK and France. The Russian market recovery continues from low levels.

The North American market was 4% above last year with growth in compact excavators and larger excavators.

The South American market recorded growth from very low levels, driven by markets outside Brazil. Brazil is continuing to struggle with low overall business confidence and economic uncertainty.

In Asia (excl. China) the total market was 8% above last year, driven by growth in India, Japan and Korea. There was strong growth also in Indonesia driven by the recovery in the mining segment.

The Chinese market was 65% above last year with a strong recovery in demand for both excavators and wheel loaders.

Orders and deliveries

In Q2 2017 order intake increased by 54% to 16,209 machines due to a continued global market recovery with strong order intake in China and rapid growth in Russia. Deliveries increased by 49% to 17,472 machines largely due to higher sales in China as well as stable growth in Europe and North America.

Orders in China increased by 221% driven by increased demand for SDLG wheel loaders as well as orders of both Volvo and SDLG excavators. Q2 2016 in China was low as a result of prebuys in Q1 2016 ahead of the introduction of new engine regulations from April 1, 2016.

In North America orders increased by 12% mainly due to increased demand for Volvo branded larger excavators and larger wheel loaders.

Orders in Europe increased 3% mainly due to a higher intake in Russia.

In South America a 53% order increase was recorded from very low levels last year driven by markets outside Brazil.

Net sales and operating income

In Q2 2017, net sales increased by 36% to SEK 18,511 M (13,630). Adjusted for currency movements net sales increased by 29% compared with Q2 2016, of which net sales of machines increased by 33% and service sales increased by 7%.

Both adjusted and reported operating income amounted to SEK 2,460 M (810), corresponding to an operating margin of 13.3% (5.9). Earnings were positively impacted by higher sales and capacity utilization. The rightsizing of the R&D organization contributed to keeping the operating expenses on the same level as last year. In Q2 2016 operating income was negatively impacted by SEK 176 M from a credit provision in China.

Currency movements had a positive impact on operating income in an amount of SEK 160 M.

Important events

Q2 2017 saw Volvo Construction Equipment unveil its latest concept machine – known as the EX2 – to industry specialists, policymakers, the media and academics at the Volvo Group Innovation Summit. The 100% electric compact excavator prototype delivers zero emissions, 10 times higher efficiency and 10 times lower noise levels.

Volvo CE also announced the appointment of a new president. Effective January 2018, Melker Jernberg will take over from current President Martin Weissburg, who will take up a position as Senior Advisor to Volvo Group President and CEO Martin Lundstedt.

BUSES

Good order intake

- » Total order intake increased by 7%
- » Operating margin at 4.6%
- » Largest ever coach order in North America, and important order for fully electric buses in Sweden

Total order intake for Q2 2017 increased by 7%, mainly driven by North America. The quarter presents a slightly weaker European bus market, but still at a high level. North America presents a stable market at a high level with continued good coach sales and demand for transit buses.

Demand continues to be at a low level in Brazil, but is stabilizing, whereas development in the rest of Latin America is more positive. The Indian market is gradually coming back, especially in the private segment. New important bus orders were also received in the Philippines and Indonesia.

Volvo Buses delivered 2,338 buses in Q2 2017, a decline of 17% compared to the same period in 2016. This was mainly driven by weakened Nordic and Brazilian markets, whereas North America developed in a more favorable way.

During the quarter Volvo Buses secured its largest ever order for coaches in North America, in a frame agreement for 360 coaches to be delivered to GLI (Greyhound/First Group) over the next three years.

Swedish bus operator Nobina ordered 13 fully electric Volvo buses to operate in the city of Malmö from the end of next year. Maintaining a position at the forefront of electrification, the first commercially manufactured full-electric Volvo buses started operating in the city of Differdange in Luxembourg.

In Q2 2017, net sales increased by 4% to SEK 6,971 M compared to the same period in 2016. Adjusted for currency movements, sales remained at the same level as last year. Vehicle sales decreased by 1% while deliveries declined by 17%. This is explained by a higher share of complete vehicles in North America versus lower chassis sales in South America. Service sales increased by 5%, adjusted for currency.

Both adjusted and reported operating income amounted to SEK 320 M (313), corresponding to an operating margin of 4.6% (4.6). Operating income was positively affected by a favorable product and market mix and positive effects from efficiency initiatives, which helped to offset 17% lower bus volumes. Compared to Q2 2016, currency movements had a negative impact on operating income of SEK 37 M.

VOLVO PENTA

Sales growth continues with increased profitability

- » Sales growth in both industrial and marine segments
- » Operating margin of 15.5% (14.5)
- » Volvo Penta acquires majority in the innovative outboard motor manufacturer, Seven Marine

Outboard motors from Seven Marine.

The overall marine leisure market remains flat, with signs of a modest increase. The gasoline segment is still at low levels, but Volvo Penta is gaining market share. In July, Volvo Penta acquired a majority in the US-based, outboard motor manufacturer, Seven Marine, which produces the most powerful outboard models in the world, running at 557 and 627 hp. This deal will broaden Volvo Penta's marine leisure technology platform, securing an entry in the outboard motor market.

The marine commercial market is still impacted by low demand from customers in the oil and gas industry. In May, Volvo Penta revealed its concept to meet future marine emission standards, IMO Tier III, at the Nor-Shipping International trade fair in Oslo.

The market for industrial off-road engines continues to show positive signs – with stability in the material handling and mining segments and increasing demand in the construction and agriculture segments. At the international forestry show Elmia Wood in June, Volvo Penta revealed its European Stage V D8 engine. Strong growth continues for Volvo Penta within the off-road engine segment.

The market for industrial power generation engines shows a slight increase in Asia, the Middle East, and the export-oriented European market. The market in North America is showing positive signs while the domestic European market is stable on low levels.

Net order intake in Q2 2017 increased by 9% to 10,805 units, while deliveries increased by 11% to 11,226 units.

Net sales increased by 15% to SEK 3,081 M (2,679). Adjusted for currency movements, net sales increased by 10%, of which net sales of engines increased by 13%, due to increased volumes for both industrial and marine segments, and net sales of services increased by 2%, primarily driven by positive growth globally.

Both adjusted and reported operating income amounted to SEK 479 M (389). The operating margin was 15.5% (14.5). Earnings were positively impacted by currency and higher sales. Compared with Q2 2016, operating income was impacted positively by currency movements in an amount of SEK 31 M.

FINANCIAL SERVICES

Continued good financial performance

- » Good volume
- » Continued good portfolio performance
- » Solid profitability

Volvo Financial Services (VFS) recorded higher levels of new business volume on stable deliveries and improved penetration, despite intense competition in most markets. The portfolio increased by 3% on a currency adjusted basis during the quarter.

The portfolio continued to perform well during the quarter, highlighted by low customer overdues and credit losses in most markets. The Brazil portfolio continues to be negatively impacted by the economic downturn and the proactive management of this market decline remains a top priority.

During Q2 2017, operating income increased to SEK 521 M (499) mainly due to positive currency movements and lower credit provisions which were partly offset by increased operating expenses. The return on equity improved to 14.0% (13.5).

During the quarter, VFS syndicated approximately SEK 1.7 billion of the credit portfolio across a number of markets, effectively reducing concentration risks and freeing up credit capacity to support sales.

IMPORTANT EVENTS

Melker Jernberg appointed President of Volvo Construction Equipment

On July 3 Melker Jernberg was appointed President of Volvo Construction Equipment and member of the Volvo Group Executive Board. He is currently President and CEO of the Sweden-based powder metallurgy company Höganäs AB and will assume his new position on January 1, 2018. Melker Jernberg replaces Martin Weissburg, who due to family reasons has decided to move back to the US and will take up a position as Senior Advisor to Volvo's President and CEO Martin Lundstedt.

The Volvo Group sold its shares in Deutz AG

On July 7 the Volvo Group sold its complete holding in the German listed engine manufacturer Deutz AG. Divestment proceeds amounted to SEK 1,897 M, which will impact the Group's cash flow in the same amount. The sale will result in

a capital gain of approximately SEK 350 M that will impact operating income in the third quarter of 2017.

New Volvo long-haul tractor in North America

On July 11 Volvo Trucks revealed the new Volvo VNL series for North America. The Volvo VNL is a long-haul tractor with cutting-edge innovations in efficiency, productivity, safety and uptime. The new truck is available in several configurations, including an all-new, 70-inch sleeper.

Previously reported important events

- Annual General Meeting of AB Volvo
- New heavy-duty and medium-duty trucks from UD
- New Volvo truck for regional haul in North America

¹ Earnings per share are calculated as Income for the period (excl. Minority interests) divided by the weighted average number of shares outstanding during the period.

NOTE 1 | ACCOUNTING PRINCIPLES

The Volvo Group applies International Financial Reporting Standards (IFRS) as endorsed by the EU. The accounting principles adopted and definitions are consistent with those described in the Volvo Group Annual Report 2016 (available at www.volvogroup.com). There are no new accounting principles applicable from 2017 that significantly affects the Volvo Group.

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act.

The parent company applies the Swedish Annual Accounts Act and RFR 2 Reporting for legal entities.

NOTE 2 | RISKS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

All business operations involve risk – managed risk-taking is a condition of maintaining a sustained favorable profitability. Risk may be due to events in the world and can affect a given industry or market. Risk can be specific to a single company. Volvo Group works continuously to identify, measure and manage risk, and in some cases Volvo Group can influence the likelihood that a risk-related event will occur. In cases in which such events are beyond Volvo Group's control, the aim is to minimize the consequences.

The risks to which the Volvo Group is exposed are classified into three main categories:

External-related risks – such as the cyclical nature of the commercial vehicles business, intense competition, changes in prices for commercial vehicles and government regulations;

Financial risks – such as currency fluctuations, interest levels fluctuations, valuations of shares or similar instruments, credit risk and liquidity risk and;

Operational risks – such as market reception of new products, reliance on suppliers, protection and maintenance of intangible assets, complaints and legal actions by customers and other third parties and risk related to human capital.

For a more elaborate account of these risks, please refer to the Risk Management section on pages 106-111 in the Volvo Group Annual Report 2016 (available at www.volvogroup.com).

Risk updates for the reporting period

Short-term risks, when applicable, are also described in the respective segment section of this report.

An increase in demand could potentially result in delivery disturbances due to suppliers' financial instability or shortage of resources.

Uncertainty regarding customers' access to the financing of products in emerging markets might have a negative impact on demand.

Volvo verifies annually, or more frequently if necessary, the goodwill value of its business areas and other intangible assets for possible impairment. The size of the surplus value differs between the business areas and they are, to a varying degree, sensitive to changes in the business environment. Instability in the business recovery and volatility in interest and currency rates may lead to indications of impairment.

The reported amounts for contingent liabilities reflect a part of Volvo Group's risk exposure. Total contingent liabilities as of June 30, 2017, amounted to SEK 14.5 billion, a decrease of SEK 1.6 billion compared to December 31, 2016. The decrease is mainly related to expired bid and performance guarantees. The gross exposure of SEK 14.5 billion is partly reduced by counter guarantees and collaterals. The contingent liabilities for credit guarantees for construction equipment in China have decreased compared to December 31, 2016. However, including both contingent liabilities and on-balance sheet exposure, the exposure is still significant.

The legal proceedings and investigations described in note 21 and note 24 in the Volvo Group Annual Report 2016 are progressing but no material changes have occurred in these matters in the second quarter of 2017.

NOTE 3 | CORPORATE ACQUISITIONS AND DIVESTMENTS

Acquisitions and divestments

Volvo has not made any acquisitions or divestments of operations during the second quarter that have had a significant impact on the Volvo Group.

Assets and liabilities held for sale

At the end of the second quarter assets amounting to SEK 7,301 M and liabilities amounting to SEK 4,855 M are classified as held for sale. Assets and liabilities held for sale has increased in the second quarter mainly due to the divestment of Volvo Construction Equipment's British dealership.

NOTE 4 | CURRENCY AND FINANCIAL INSTRUMENTS

Fair value of financial instruments

Valuation principles and principles for hedge accounting for Volvo Group financial instruments, as described in Volvo Group Annual Report 2016 Note 30 (available at www.volvogroup.com), have been consistently applied throughout the reporting period. Financial instruments in the Volvo Group reported at fair value through profit and loss consist mainly of marketable securities (see balance sheet) and interest-, currency- and raw material derivatives. Derivatives with positive fair values amounted to SEK 4.0

billion and derivatives with negative fair values amounted to SEK 0.4 billion as of June 30, 2017. The derivatives are accounted for on gross-basis. Financial liabilities valued at amortized cost, reported as current and non-current bond loans and other loans, amounted to SEK 131.2 billion in reported carrying value with a fair value of SEK 133.9 billion. In the Volvo Group consolidated financial position, financial liabilities include loan-related derivatives with negative fair values amounting to SEK 0.1 billion.

AUDITOR'S REPORT

AB Volvo (publ) org nr 556012-5790

Introduction

We have reviewed the condensed interim financial information (interim report) of AB Volvo (publ) as of 30 June 2017 and the six-month period then ended. The board of directors and the CEO are responsible for the preparation and presentation of the interim financial information in accordance with IAS 34 and the Swedish Annual Accounts Act. Our responsibility is to express a conclusion on this interim report based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements ISRE 2410, Review of Interim Report Performed by the Independent Auditor of the Entity. A review consists of making inquiries, primarily of persons responsible for

financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing, ISA, and other generally accepted auditing standards in Sweden. The procedures performed in a review do not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report is not prepared, in all material respects, in accordance with IAS 34 and the Swedish Annual Accounts Act, regarding the Group, and with the Swedish Annual Accounts Act, regarding the Parent Company.

This information is information that AB Volvo (publ) is obliged to make public pursuant to the EU Market Abuse Regulation and the Securities Markets Act. The information was submitted for publication, through the agency of the contact person set out in the press release concerning this report, at 7.20 CEST on July 19, 2017.

This report contains forward-looking statements that reflect the Board of Directors' and management's current views with respect to certain future events and potential financial performance. Although the Board of Directors and the management believe that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, (i) changes in economic, market and competitive conditions, (ii) success of business and operating initiatives, (iii) changes in the regulatory environment and other government actions, (iv) fluctuations in exchange rates and (v) business risk management.

This report does not imply that the Company has undertaken to revise these forward-looking statements, beyond what is required under the company's registration contract with Nasdaq Stockholm, if and when circumstances arise that will lead to changes compared to the date when these statements were provided.
