

**April 13, 2020**

LVO Employees:

Following the communication on April 1, 2020, the suspension of production at LVO will continue through at least Friday, May 1, 2020. Our current plan is to start, in late April, the advance preparation work necessary for a return to a lower-level production in early May with a gradual ramp. This will enable us to produce safely and incorporate enhanced measures to maintain appropriate social distancing throughout our work environments.

We are in close contact with the State of Pennsylvania and this re-start plan is subject to having the necessary support from the supply base and state officials for a return to production.

We will keep you updated, and we will also launch our LVO COVID-19 information web site this week outlining our COVID-19 response as we continue to put the health and safety of our employees first.
