

THE VOLVO GROUP

GRADUATE PROGRAMS 2020

Transportation is changing. How about you?

The easiest way to understand the impact our work has is to imagine a world without transportation. The work in our offices, labs and manufacturing plants result in better ways for people to get to work, build new roads, homes and cities; and access what they need in their everyday life. Sustainable and efficient transport solutions are essential for any society to prosper.

With major technological paradigm shifts ahead, there have never been more exciting times working with transport solutions. That is why we believe that the transportation business in general and the Volvo Group in particular is where you want to be now as well as in the years to come.

With our three graduate programs we aim to attract fresh talent to the Volvo Group. Your ambition to grow – professionally and personally – is what makes our company prosper. And as a truly global organization we offer you a world of opportunities to explore!

If you want to work where the action is – don't miss out on the opportunity of becoming one of the 100+ graduate program participants in 2020.

Welcome to the Volvo Group Graduate programs.

Audur Bjarnadóttir and Emmy Wislander

Operations

Is developing the next generation of manufacturing plants your ideal challenge? Do you want to influence the future in the global exchange of goods, service and information? Then this deep dive into the Volvo Group's manufacturing organization is an excellent start to your career.

During 15 intense and exciting months, the program will give you a holistic view of our manufacturing and logistics organization and activities, with both a local and global perspective. You will get to know our different brands and their plants and learn about lean manufacturing. You will be working with the manufacturing technologies of tomorrow, building the products of the future – electric, connected and automated. In parallel, you will grow as a person, through individual and team development sessions.

WHAT WE OFFER

You will have a permanent position from day one, experience several »on-the-job« rotations and have the opportunity to work on real project assignments. In addition, you will join a number of learning modules where you get together with other program participants to take part in trainings and events designed to help you grow into your future career at the Volvo Group.

OUR TARGET GROUP

We are looking for candidates with a BSc or MSc in engineering science, computer science, electrical engineering or logistics.

Engineering

Are you passionate about complex engineering projects and eager to use your technical skills to solve real business problems and drive innovation? Then this one-year program will kick-start your career.

From the start, you will be part of our global product development team, work with our experts and develop as an engineer in cutting-edge technologies. Our inspiring projects, innovative products and diverse workforce will serve as a great platform to start your career. You will get to use your engagement and creativity to design, test and develop the next generation of products and services for customers all over the world.

WHAT WE OFFER

You will have a full-time, permanent position right from day one, with placement in Sweden, France, India or USA. Working side-by-side with highly specialized teams you will develop the skills you need to succeed and make a valuable contribution right from the start. Together with the other graduates, you will travel to our different sites, learn more about our products and customers and take part in individual and team development sessions to help you grow into our global team of key engineering talents.

OUR TARGET GROUP

We are looking for candidates with a MSc in one of the following fields: electrical engineering; mechanical engineering; industrial software engineering.

Karin Carolin

Joakim Finn

IT

Are connectivity, electrification and digitalization concepts that trigger your imagination? Would you like to be in the epicentre of IT development and help create the business of tomorrow? If so, this program will give you a great foundation for your future career.

Here, you will get to work together with some of the brightest and most creative people in the Information Technology field. You will deep dive into the organization, with some 6000 people, that are responsible for managing, sourcing and delivering IT Solutions and Services.

WHAT WE OFFER

From the start, you will have a permanent position within the Volvo Group. During the 12 months program, you will work on real projects, side by side with colleagues across the globe. In parallel, you and your fellow graduate program participants will take part in common learning modules designed to help you grow your network, develop as a person and prepare you for your future career in the Volvo Group.

OUR TARGET GROUP

We are looking for candidates with a BSc or MSc in Science, Engineering, Computer Science, Business Administration or equivalent and a passion for IT.
