

PARKING PERMIT APPLICATION

All vehicles must register with corporate security. Once you receive an access card, you may not park in reserved or visitor's spaces anywhere. Vehicles violating this policy will be towed at owner's expense. Permit is to be displayed in the rear window, right hand corner. If this is not possible, then the permit should be displayed in the next most conspicuous place available.

All vehicle information is required in full; parking permit will be issued upon completion of this permit application. In the event portions of this application are left incomplete, you will have twenty-four hours to provide security with the remaining information. If you do not reply with the required information at that time, your access card will be deactivated until the information is received.

Drivers License Number _____

State of Issue _____
