3 CEO'S COMMENTS

Solid performance in an increasingly uncertain market

"We have high customer satisfaction and strong relations, and in times of uncertainty it is more important than ever to work in close cooperation with our customers."

In Q1, the Volvo Group's net sales declined by 7% adjusted for currency movements and amounted to SEK 121.8 billion (131.2). Sales of vehicles were 9% lower than in Q1 2024 and as the quarter went by, there was increased uncertainty surrounding tariffs and their effect on global trade. The underlying service business continued to grow supported by good utilization of vehicles and machines in many markets across the world. Adjusted for the divestment of Arquus and currency our service business grew by 2% compared with Q1, 2024, and on a rolling 12-month basis we had service revenues of SEK 129.2 billion.

The lower vehicle volumes affected our profitability, but we nonetheless generated an operating income of SEK 13.3 billion (18.2) with a margin of 10.9% (13.8). Return on capital employed amounted to 31.8% (37.7) and operating cash flow in our Industrial Operations was SEK 1.3 billion (8.9). At the end of the quarter, we had a net financial position of SEK 77.9 billion, excluding pension and lease liabilities and before the distribution of the dividend in April.

Compared with Q1 2024, deliveries in our truck business declined by 12% to 48,833 trucks, and the currency-adjusted net sales decreased by 9% to SEK 82.2 billion. In contrast to the lower deliveries, order intake rose by 13% to 55,227 trucks, with increases in all markets except South America. The operating margin amounted to 10.3% (14.5), impacted by the lower deliveries. In addition, the margin was impacted by the change-over to the new truck platform in North America as well as under absorption in the U.S. truck production.

It is clear that our customers appreciate our new trucks and the benefits they provide for their businesses. In Europe, Volvo Trucks had an all-time high market share of 20.1% in heavy-duty trucks. Combined with Renault Trucks, the Group's share was a record 30.6%, We were also the market leader in Brazil with Volvo Trucks on 23.8%. Volvo Trucks' market share in North America has been hampered by the changeover to the new product platform, whereas Mack Trucks have regained market share as supply chain issues have been worked through.

On April 8, Mack celebrated its 125th anniversary and launched the all-new Mack Pioneer for long-haul trucking. The Mack Pioneer is designed for superior comfort, advanced aerodynamics and game-changing fuel efficiency and is a strong lever for further strengthening Mack's position going forward.

Construction Equipment's deliveries increased by 7% with lower volumes for the Volvo brand in Europe and North America more than being offset by an increase for the SDLG brand mainly in China. The net sales of SEK 21.1 billion were 8% lower than in

the previous year adjusted for currency changes, and the operating margin declined to 12.0% (16.1) impacted by the lower volumes in Europe and North America.

On the construction equipment side, we also continue to push innovation with the rollout of new products. At the large trade fair Bauma in Germany in early April we showcased our groundbreaking all-electric lineup of excavators, wheel loaders, articulated haulers, and compact equipment, and we also unveiled the world's first electric articulated haulers in the A30 and A40 size classes.

Demand for buses remained strong in many markets, particularly for coaches. Buses currency-adjusted net sales increased by 7% to SEK 5.4 billion with an improvement in the operating margin to 6.6% (5.0) supported by price realization and the restructuring of the business model in Europe carried out in 2024.

Volvo Penta continued to perform well on slightly lower volumes in Q1. Net sales decreased by 3% to SEK 5.0 billion and the operating margin amounted to 18.3% (19.1), supported by a positive mix.

Our customer financing operations, Volvo Financial Services, continued to report good earnings, stable portfolio performance and an increase in the penetration level to 29%. The operating income amounted to SEK 1.0 billion (1.0).

We have high customer satisfaction and strong relations, and in times of uncertainty it is more important than ever to work in close cooperation with our customers. We stay close to support their businesses as efficiently as possible with leading products and services. We have a solid foundation with the right people, a well-invested industrial backbone, cutting-edge technology and a strong financial position.

In the fast-changing geopolitical landscape, it is too early to assess the full implications from the imposed tariffs. However, we have strong regional value chains and global capabilities. In the short term, we therefore work actively with our regional value chains to adapt flows, production capacity and commercial terms to mitigate the effects from tariffs and their subsequent impact on demand.

In the long term, transport and infrastructure remain exciting growth industries at the core of driving prosperity.

Martin Lundstedt
President and CEO

4 IMPORTANT EVENTS

Annual General Meeting of AB Volvo

AB Volvo's Annual General Meeting on April 2, 2025 adopted the income statement and balance sheet as well as the consolidated income statement and the consolidated balance sheet. In accordance with the Board's proposal, the Meeting resolved that an ordinary dividend of SEK 8.00 per share and an extraordinary dividend of SEK 10.50 per share should be paid to the shareholders. April 4, 2025 was decided as the record date for the right to receive dividends. The Board Members, Board Deputies and the President and CEO were discharged from liability for their administration during the 2024 fiscal year. Matti Alahuhta, Bo Annvik, Pär Boman, Jan Carlson, Eric Elzvik, Martha Finn Brooks, Kurt Jofs, Martin Lundstedt, Kathryn V. Marinello, Martina Merz and Helena Stjernholm were re-elected as members of the Board. Pär Boman was re-elected as Chairman of the Board. The auditing firm Deloitte AB was re-elected as auditor for the period until the close of the Annual General Meeting 2026, in accordance with the Election Committee's proposal and the Board's and the Audit Committee's recommendation. Fredrik Persson (AB Industrivärden), Anders Oscarsson (AMF and AMF Funds), Carina Silberg (Alecta), Anders Algotsson (AFA Insurance) and the Chairman of the Board were elected members of the Election Committee. The Annual General Meeting approved the Board's remuneration report.

5 FINANCIAL SUMMARY

Net sales

In Q1 2025, the Volvo Group's net sales decreased by 7% to SEK 121,792 M compared with SEK 131,177 M in the same quarter the preceding year. Net sales decreased in all regions and in all segments except Buses.

Also when adjusted for currency movements, net sales decreased by 7%, of which vehicle sales decreased by 9% and service sales decreased by 1%.

Operating income

In Q1 2025, both adjusted and reported operating income amounted to SEK 13,258 M (18,159), corresponding to an operating margin of 10.9% (13.8). For more information on adjusted operating income, please see Note 6.

Compared with Q1 2024, the operating income was negatively affected by lower volumes, a negative brand and product mix, the changeover to new truck platform in North America as well as under absorption in the truck production in the U.S. These were partly offset by an improved service business, lower freight costs

as well as decreased R&D, selling and administrative expenses. Currency movements, compared with Q1 2024, had a negative impact of SEK 207 M.

Financial items

In Q1 2025, interest income was SEK 638 M (885), whereas interest expenses amounted to SEK -409 M (-364).

Other financial income and expenses amounted to SEK -632 M (-238). The change is primarily due to revaluation effects of financial assets and liabilities.

Income taxes

In Q1 2025, income taxes amounted to SEK -2,871 M (-4,339). The effective tax rate was 22.3% (23.5).

Income for the period and earnings per share

In Q1 2025, income for the period amounted to SEK 9,984 M (14,103). Earnings per share amounted to SEK 4.86 (6.92).

Operating cash flow in the Industrial Operations

During Q1 2025, operating cash flow in the Industrial Operations was positive in an amount of SEK 1,309 M (8,896). Compared with Q1 2024, the decreased operating cash flow is mainly an effect of the lower operating income.

7 FINANCIAL SUMMARY

Volvo Group financial position

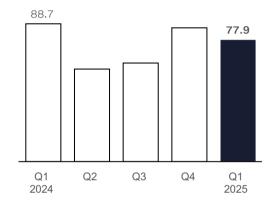

During Q1 2025, net financial assets in the Industrial Operations, excluding provisions for post-employment benefits and lease liabilities, decreased by SEK 7.9 billion resulting in a net financial asset position of SEK 77.9 billion on March 31, 2025, compared with SEK 85.9 billion on December 31, 2024. The change is mainly explained by capital injections to Financial Services, made in order to increase their equity ratio from 8.0% to 10.0%. Currency movements decreased net financial assets by SEK 2.5 billion.

Including provisions for post-employment benefits and lease liabilities, the Industrial Operations net financial assets amounted to SEK 61.4 billion on March 31, 2025, compared with SEK 67.2 billion on December 31, 2024. Remeasurements of defined benefit pension plans had a positive impact of SEK 1.2 billion during Q1 2025.

Total assets in the Volvo Group decreased by SEK 26.9 billion compared with year end 2024, whereof SEK 38.9 billion is related to currency movements.

On March 31, 2025, total equity for the Volvo Group amounted to SEK 199.2 billion compared with SEK 197.4 billion at year end 2024. The equity ratio was 29.0% (27.6). On the same date the equity ratio in the Industrial Operations amounted to 39.1% (38.4).

9 TRUCKS

All time high market share for Volvo in Europe

- In Q1, net order intake increased by 13% while deliveries decreased by 12%
- Adjusted and reported operating income decreased to SEK 8,464 M (13,073), with a margin of 10.3% (14.5)
- Service sales increased by 1%, adjusted for currency

Market development

In Q1, the European heavy-duty truck market was down by 15% in terms of registrations. Truck utilization remained on normal levels and the market is largely replacement-driven.

Recently announced increases in defense spending in Europe is expected to gradually drive demand from armed forces. The Group's global deliveries of trucks to armed forces amount to approximately 1,500 trucks per year.

Also in North America the market was down compared with Q1 2024 with retail sales being 13% lower mainly driven by a weaker long haul segment while the vocational segment remained stronger. Recent uncertainty surrounding trade tariffs and the EPA27 emissions legislation have caused US customers to adopt a wait and see approach. There is no longer an expectation of a prebuy in 2025 due to EPA27.

The Brazilian truck market remained on a level broadly on par with the prior year. The market is supported by continued strong agricultural and mining exports, but high inflation and increased interest rates are expected to gradually dampen demand.

In Q1 2025, the Indian truck market was supported by ongoing infrastructure projects and gradually strengthening freight demand.

The freight overcapacity in China continued to hamper demand for trucks and the total market declined year of year. The market for battery-electric applications continued to grew.

Orders and deliveries

In Q1, net order intake increased by 13% to 55,227 trucks and deliveries decreased by 12% to 48,833 units. Deliveries of heavyduty trucks decreased by 7%, of medium-duty trucks by 26% and for light-duty trucks the decrease was 36%.

In Europe, order intake increased by 25% to 31,362 units. Order intake for heavy- and medium-duty trucks increased by 35% with good momentum for both Volvo and Renault Trucks. Total deliveries in Europe decreased by 18% to 24,047 trucks,

impacted by deliveries of light-duty vehicles decreasing by 36% as a consequence of a model changeover. Through March, Volvo Trucks' total heavy-duty market share reached an all-time high of 20.1% (16.8). The electric heavy-duty market share was 36.5% (56,8). Renault Trucks' also had strong total heavy-duty truck market share, which increased to 10.5% (8.2). The electric heavy-duty market share increased to 23.6% (15.4).

Order intake in North America increased by 6% to 10,217 trucks with strong demand for Mack's vocational trucks while order intake for Volvo was impacted by the changeover to the new platform. Deliveries in North America decreased by 5% to 14,315 trucks. Volvo Trucks' heavy-duty truck market share amounted to 7.2% (9.1) hampered by the model changeover while Mack Trucks' market share rose to 6.9% (5.3) on the back of an improved supply chain and good vocational demand.

In South America, order intake decreased by 25% to 5,948 trucks while deliveries increased by 5% to 5,397 vehicles. In Brazil, Volvo Trucks' remained the market leader with a heavy-duty truck market share of 23.8% (22.3).

Order intake in Asia increased by 35% to 5,556 vehicles while deliveries decreased by 11% to 3,315 vehicles.

Order intake for fully electric trucks increased by 51% to 965 vehicles, largely driven by the light-duty segment while deliveries decreased by 9% to 828 vehicles. The market for electric trucks is still driven by early adopters. A broader adoption is dependent on several factors, among them the expansion of necessary infrastructure such as charging and the total cost of ownership development including incentive schemes.

Order intake in the Indian joint venture, VE Commercial Vehicles, increased by 9% to 20,213 vehicles while deliveries increased by 6% to 20,580 vehicles.

Deliveries from the Chinese joint venture, Dongfeng Commercial Vehicles, increased by 33% to 30,432 trucks.

Net sales and operating income

In Q1 2025, net sales decreased by 9% to SEK 82,248 M (89,946). Excluding currency effects, net sales decreased by 8% with sales of vehicles decreasing by 10% and sales of services increasing by 1%.

In Q1 2025, both adjusted and reported operating income amounted to SEK $8,464 \, M$ (13,073), corresponding to an operating margin of 10.3% (14.5). For more information on

adjusted operating income, see note 6.

Compared with Q1 2024, the lower operating income is an effect of lower volumes, the changeover to the new truck platform in North America and under absorption in the truck production in the U.S., which were partly offset by an improved service business, lower freight costs and lower R&D expenses. Compared with Q1 2024, currency movements had a negative impact of SEK 58 M.

Important events

In the beginning of March, Volvo Trucks launched a completely new Volvo VNR for the North American regional haul market. It is built on Volvo's new platform, making the new truck more fuel efficient, safer and more versatile.

Volvo's most fuel-efficient truck ever – the Volvo FH Aero – won the 2025 Green Truck award. The Volvo FH Aero offers a combination of good aerodynamics and an efficient powertrain, resulting in savings in fuel and ${\rm CO_2}$ according to an independent test in Germany.

On April 8, Mack Trucks unveiled the all-new Mack Pioneer, its new flagship highway truck. Available in the U.S. and Canada in multiple configurations including day cabs, and short, medium and long sleeper options, the Pioneer meets the diverse needs of fleet owners and operators across all highway applications.

12 CONSTRUCTION EQUIPMENT

Earnings impacted by lower volumes in Europe and North America

- In Q1, order intake increased by 24% and deliveries increased by 7%
- Adjusted and reported operating income decreased to SEK 2,542 M (3,683), with a margin of 12.0% (16.1)
- Service sales increased by 2%, adjusted for currency

Market development

In Q1, the total machine market was flat compared with the prior year. Asia, including China, and South America grew while Europe and North America contracted.

Compared with the historically high levels in Q1 2024, the total market in Europe declined as end customer demand remained saturated.

The North American market was down from very high levels, as replenishment of dealer and rental fleets continued to normalize. End customer demand declined due to repositioning of fleets and market outlook uncertainty.

In South America, the market grew mainly driven by Brazil but also by improved business sentiment in Argentina and Chile.

The Chinese market continued to grow on the back of governmental policies to stimulate the real estate and construction segments.

Asia excluding China was slightly up, with growth in Indonesia driven by regained momentum in the mining industry as well as a good development in South Korea. India, Turkey and the Middle

East experienced declines mainly because of revised government investments in infrastructure.

Orders and deliveries

In Q1, net order intake increased by 24% to 17,176 machines. Order intake for the Volvo brand increased by 19% with improvements in all markets except South America.

In Europe, dealer orders increased as dealer inventory levels came down and end customer sentiment improved.

The increased order intake in North America is an effect of more normalized supply and low order intake in the prior year due to high inventory levels in the market.

Order intake for SDLG branded machines improved by 30% driven by the Chinese market.

Deliveries in Q1 were 7% higher than in 2024 and amounted to 15,508 machines. Increased volumes for SDLG in China more than offset lower volumes of Volvo branded machines in Europe and North America.

Net sales and operating income

In Q1 2025, net sales decreased by 8% to SEK 21,117 M (22,877). Also when adjusted for currency movements net sales decreased by 8%, of which net sales of machines decreased by 10% and service sales increased by 2%.

Both adjusted and reported operating income amounted to SEK 2,542 M (3,683), corresponding to an operating margin of 12.0% (16.1).

Compared with Q1 2024, a negative brand, market and product mix was partly offset by increased volumes, lower material costs and an improved service business. Compared with Q1 2024, currency movements had a negative impact of SEK 12 M.

Important events

In Q1, the rollout of Volvo Construction Equipment's (Volvo CE) new conventional product range continued with the launch of the A50 articulated hauler for the important North American market alongside several local launches of the new range of excavators in Asian markets.

Volvo CE also announced a partnership with Danish software company Unicontrol to integrate their 3D machine control technology into Volvo excavators.

At the construction trade show Bauma in Germany in early April, Volvo CE showcased a groundbreaking all-electric lineup of excavators, wheel loaders, articulated haulers, and compact equipment. Bauma also marked the unveiling of the world's first electric articulated haulers in the A30 and A40 size classes, which will reach selected customers in Europe in 2026.

14 BUSES

Strong order intake and continued earnings improvement

- In Q1, deliveries decreased by 5% while net order intake increased by 123%
- Adjusted and reported operating income increased to SEK 360 M (259), with a margin of 6.6% (5.0)
- Service sales increased by 10% adjusted for currency

In Q1, demand for buses remained strong in many markets, particularly in the coach segment. Net order intake increased by 123% compared with Q1 2024 from a good order intake in all regions. The transition towards electric vehicles in city traffic continued and orders for 168 electric buses were confirmed in Q1. Total deliveries decreased by 5% to 1,235 units.

In Q1, net sales increased by 5% to SEK 5,436 M (5,173). Adjusted for currency, net sales increased by 7%, with vehicle sales increasing by 5% and service sales increasing by 10%.

Both adjusted and reported operating income amounted to SEK 360 M (259), corresponding to an operating margin of 6.6% (5.0). For information on adjusted operating income, see Note 6.

Operating income was positively impacted by good price realization, a positive market mix and lower manufacturing costs

as an effect of the restructuring in Europe, while lower delivery volumes and increased material costs had a negative impact. Compared with Q1 2024, currency movements had a negative impact of SEK 30 M.

In Q1, Volvo Buses launched the new Volvo 7800 Electric in Mexico, the first electric articulated and bi-articulated bus manufactured in the country. The new electric bus is built on Volvo Buses' global electromobility platform BZR and it will evolve the Bus Rapid Transit systems in Mexico, creating a more efficient and sustainable people transport system.

The high order intake included the first order for the new intercity bus Volvo 8900 Electric. Svealandstrafiken ordered a total of 106 electric buses to operate in Sweden, whereof 60 Volvo 8900 Electric.

15 VOLVO PENTA

Good performance on lower volumes

- In Q1, order intake increased by 35% while deliveries decreased by 17%
- Adjusted and reported operating income decreased to SEK 915 M (988), with a margin of 18.3% (19.1)
- IPS Professional Platform introduced to the North American yacht market and serial production started

In Q1, demand for power generation continued to rise, driven by energy infrastructure expansion. The off-highway segment was stable with some signs of construction recovering. Demand in the marine leisure market continued to be slow, while there was good sales traction with the IPS Professional Platform in the yacht segment. The marine commercial segment remained stable, supported by demand driven by the energy transition.

In Q1, net order intake increased by 35% to 12,234 units with strong demand in the power generation segment, while deliveries decreased by 17% to 8,700 units.

Net sales decreased by 3% to SEK 5,004 M (5,168). Also when adjusted for currency movements the decrease was 3%, of

which sales of engines decreased by 5% and sales of services increased by 4%.

Both adjusted and reported operating income amounted to SEK 915 M (988), corresponding to an operating margin of 18.3% (19.1).

Earnings were negatively impacted by lower engine volumes, which were partly offset by a positive product and market mix, price realization and lower selling and administrative expenses. Compared with Q1 2024, the currency impact on operating income was negative in an amount of SEK 37 M.

In Q1, the IPS Professional Platform was introduced to the North American yacht market and went into serial production.

16 FINANCIAL SERVICES

Good earnings and stable portfolio performance

- In Q1, the net credit portfolio increased by 6%, adjusted for currency
- Stable portfolio performance
- Adjusted and reported operating income of SEK 1,019 M (1,009)

In Q1 2025, the credit portfolio for Financial Services continued to grow. Adjusted for currency, the net credit portfolio increased by 6% compared with Q1 2024. The portfolio performance continued to be good, with customer delinquencies stabilizing at average business cycle levels.

Compared with Q1 2024, new business volume increased by 5%, when adjusted for currency. In Q1, both adjusted and reported operating income increased to SEK 1,019 M (1,009).

The increase in operating income was primarily a result of continued profitable portfolio growth, which was partly offset by increased credit provisions. Currency movements had a negative impact of SEK 48 M compared with Q1 2024.

The equity level has during the quarter been raised from 8.0% to 10.0%, due to increased regulatory requirements in many of the markets where Financial Services operates. Return on equity on a rolling 12-month basis amounted to 12.7% (13.0).

NOTE 1 | ACCOUNTING POLICIES

The Volvo Group applies International Financial Reporting Standards (IFRS) as endorsed by the EU. The accounting policies and definitions are consistently applied with those described in the Volvo Group Annual Report 2024 (available at www.volvogroup.com). There are no new accounting policies

applicable from 2025 that materially affects the Volvo Group.

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act. The Parent Company applies the Swedish Annual Accounts Act and RFR 2 Reporting for legal entities.

NOTE 2 RISKS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

Each of the Volvo Group's Business Areas and Truck Divisions monitors and manages risks in its operations. In addition, the Volvo Group utilizes a centralized Enterprise Risk Management (ERM) reporting process, which is a systematic and structured framework for reporting and reviewing risk assessments and mitigations as well as for follow-up on identified risks.

The ERM process classifies Volvo Group risks into four categories:

Macro and market related risks – such as cyclical nature of the commercial vehicles industry, intense competition as well as political and social uncertainty;

Operational risks – such as transformation and technology risk, new business models, risks related to industrial operations including supply chain, reliance on suppliers and materials, cost inflation and price increases, information security and digital infrastructure, strategic transactions such as mergers and acquisitions, partnerships and divestments, residual value commitments as well as people and culture;

Compliance risks – such as product and operational related regulations, digital and data related regulations, protection and maintenance of intangible assets, legal proceedings, corruption and competition law and human rights; and

Financial risks – such as insurance coverage, credit risk, pension commitments, interest-rates and currency fluctuations, liquidity risk, as well as impairment on goodwill and other intangible assets.

For a more elaborate description of these risks, please refer to the Risk Management section on pages 60-66 in the Volvo Group Annual Report 2024.

Risk updates

Short-term risks, when applicable, are also described in the respective segment section of this report.

Tariffs and trade policy shifts

Recent tariffs and other trade restrictions imposed or considered to be imposed by the US and other countries have significantly increased uncertainty about trade conditions in markets where the Group is present, as well as in relation to global and regional supply chains. The situation is fast-changing and complex to assess, and no predictions can be made on future developments, potential impacts on the Group or whether trade restrictions may impact the Group more severely than main competitors. However, the introduction of tariffs, retaliatory tariffs or other trade restrictions on our vehicles, parts, and other products and materials could disrupt existing supply chains, impose additional costs on our business or that of our suppliers, create sudden

disadvantages for Group operations compared to competitors having different supply chains, and could generally make our products more expensive for customers and/or less competitive.

Recent developments in global trade policies have also increased the risk of a broader economic slowdown. Such developments could negatively impact global demand and lead to increased costs for e.g. raw materials, components, transport and energy. A prolonged period of trade uncertainty may also negatively affect investment levels and customer purchasing behavior, particularly in Group key markets. The Group will endeavor to adapt to changes in market conditions as they may evolve, but the introduction of trade restrictions and changes in trade policies could, individually or in combination, have a material adverse effect on the Group's business and financial performance.

Update on supply situation and inflationary pressure

Our ability to deliver according to market demand depends significantly on obtaining a timely and adequate supply of materials, components and other vital services, as well as on our ability to properly utilize the capacity in the Group's different production and services facilities. At present, our supply chain and industrial system are strained in many areas due to e.g. shortages of labor, materials and components, and transport services. Further strains on the supply chain may also evolve from other events, including financial distress of suppliers, introduction of new or amended export controls, tariffs or other restrictions on international trade and other geopolitical events. There might be supply chain disturbances and stoppages in production going forward. Such disturbances could lead to higher costs and interruptions in production and delivery of Group products and services, that could have a material negative impact on the Group's financial performance.

The Group might experience higher input costs from increased prices on e.g. purchased material, freight and energy as well as higher labor costs. If the Group is unable to compensate for the higher input costs through increased prices on products and services sold, this could have a negative impact on the Group's financial performance.

Accounts receivable

Due to the prevailing business model in the construction equipment industry in China, with long payment terms to customers, a substantial part of the Volvo Group's accounts receivable is related to customers in this market. The weakened Chinese construction equipment market is currently impacting customers' and dealers' profitability negatively. This might affect

their ability to honor their obligations to the Group and may consequently have a material adverse effect on the Group's financial result and position.

Detected premature degradation of emissions control component

As previously communicated, the Volvo Group has detected that an emissions control component used in certain markets and models, may degrade more quickly than expected, affecting the vehicles emission performance negatively. The Volvo Group made a provision of SEK 7 billion impacting the operating income in Q4 2018, relating to the estimated costs to address the issue. Negative cash flow effects started in 2019 and will continue in the coming years. As of year-end 2024, approximately half of the initial provision had been utilized. The Volvo Group will continuously assess the size of the provision as the matter develops.

Contingent liabilities

The reported amounts for contingent liabilities reflect a part of Volvo Group's risk exposure. Total contingent liabilities as of March 31, 2025, amounted to SEK 15.8 billion, a decrease of SEK 1.2 billion compared with December 31, 2024. The gross exposure of SEK 15.8 billion is partly reduced by counter guarantees and collaterals.

Legal proceedings

Starting in January 2011, the Volvo Group, together with a number of other truck manufacturers, was investigated by the European Commission in relation to a possible violation of EU antitrust rules. In July 2016 the European Commission adopted a settlement decision against the Volvo Group and other truck manufacturers finding that they were involved in an antitrust infringement which, in the case of the Volvo Group, covered a 14-year period from 1997 to 2011. The Volvo Group paid a monetary fine of EUR 670 million.

Following the adoption of the European Commission's settlement decision, the Volvo Group has received and is defending itself against a significant number of private damages claims brought by customers and other third parties alleging that they suffered loss, directly or indirectly, by reason of the conduct covered in the decision. The claims relate primarily to Volvo Group trucks sold during the 14-year period of the infringement and, in some cases, to trucks sold in certain periods after the infringement ended. Some claims have also been made against the Volvo

Group that relate to trucks sold by other manufacturers. The truck manufacturers subject to the 2016 settlement decision are, in most countries, jointly and severally liable for any losses arising from the infringement.

In the region of 3,000 claims are being brought in over 20 countries (including EU Member States, the United Kingdom, Norway and Israel) by large numbers of claimants either acting individually or as part of a wider group or class of claimants. Further claims may be commenced. The litigation in many countries can be expected to run for several years.

Several hundred thousand trucks sold by the Volvo Group are currently subject to claims against it or other truck manufacturers, with claimants alleging that the infringement resulted in an increase in the prices paid for Volvo Group trucks which directly or indirectly caused them loss.

The Volvo Group maintains its firm view that no damage was caused to its customers or any third party by the conduct set out in the settlement decision, and in fact, the European Commission did not assess any potential effects of the infringement on the market. The Volvo Group considers that transaction prices our customers paid for their trucks were unaffected by the infringement and were the outcome of individual negotiations across all elements of their purchasing requirements, including not only the prices for new trucks but also (where relevant) associated products and services sold together with new trucks such as service contracts, financing, buy-back guarantees etc.

Litigation developments so far have been mixed with some adverse outcomes, although uncertainty regarding ultimate exposure to the litigation remains high and it is inherent in complex litigation that outlooks and risks fluctuate over time.

At this stage it is not possible to make a reliable estimate of the total liability that could arise from such proceedings given the complexity of the claims and the different (and in some cases relatively early) stages to which national proceedings have progressed. However, the litigation is substantial in scale and any adverse outcome or outcomes of some or all of the litigation, depending on the nature and extent of such outcomes, may have a material negative impact on the Volvo Group's financial results, cash flows and financial position. In light of progress in litigations and current risks, the Volvo Group has in Q2 2023 recognized a cost of SEK 6 billion (in addition to previously recognized costs of SEK 630 M and besides legal fees to advisors), relating to aspects of the litigation that are currently possible to estimate and where an outflow of resources is probable. This is Volvo Group's current assessment, which may change as the litigation progresses.

NOTE 3 ACQUISITIONS AND DIVESTMENTS

Acquisitions and divestments

The Volvo Group has not completed any acquisitions or divestments of operations during the first quarter that have had a material impact on the financial statements.

Assets and liabilities held for sale

Assets and liabilities held for sale amounted to net SEK 358 M (368) as of March 31, 2025, which mainly relates to planned property divestments.

NOTE 4 | CURRENCY AND FINANCIAL INSTRUMENTS

Fair value of financial instruments

Valuation principles and classifications of Volvo Group financial instruments, as described in Volvo Group Annual Report 2024 Note 30, have been consistently applied throughout the reporting period. Financial instruments in the Volvo Group reported at fair value through profit and loss consist mainly of interest and currency derivatives. Derivatives with positive fair values amounted to SEK 7.4 billion (6.3) and derivatives with negative fair values amounted to SEK 2.6 billion (5.9) as of March 31, 2025. The derivatives are accounted for on gross basis.

Financial liabilities valued at amortized cost, reported as noncurrent and current bond loans and other loans, amounted to SEK 253.0 billion (258.9) in reported carrying value with a fair value of SEK 253.1 billion (258.7). In the Volvo Group consolidated financial position, financial liabilities include loan-related derivatives with negative fair values amounting to SEK 1.3 billion (4.8).

This is information that AB Volvo (publ) is obliged to make public pursuant to the EU Market Abuse Regulation and the Securities Market Act. The information was submitted for publication, through the agency of the contact person set out in the press release concerning this report, at 07.20 CET on April 23, 2025.

This report contains forward-looking statements that reflect the Board of Directors' and management's current views with respect to certain future events and potential financial performance. Forward-looking statements are subject to risks and uncertainties. Results could differ materially from forward-looking statements as a result of, among other factors, (i) changes in economic, market and competitive conditions, (ii) success of business initiatives, (iii) changes in the regulatory environment and other government actions, (iv) fluctuations in exchange rates and (v) business risk management.

This report is based solely on the circumstances at the date of publication and except to the extent required under applicable law, AB Volvo is under no obligation to update the information, opinions or forward-looking statements in this report.
