

## How to search for drawings

When searching for standards, please go to <http://www.volvogroup.com/en-en/suppliers/useful-links-and-documents/corporate-standards/search-for-drawings.html> and following the instructions below.

Generally, the concerned Volvo purchasing department should provide their suppliers with the necessary drawings.

Only standard-parts drawings and Volvo CE standard-parts drawings are available on-line (these drawings have numbers between 1052000 and 1061999 or numbers beginning with 11131 and three additional digits). If the drawing you searched for is not available on-line, please contact the purchasing department at the Volvo company in question to obtain the document.

For other questions on drawings, please send an e-mail to [Corporate.Standards@volvo.com](mailto:Corporate.Standards@volvo.com)

### How to fill in the search form

1. When searching for a drawing of standard parts via drawing No.:

- Enter a complete drawing No., for example 180720.

2. When searching for a drawing of standard parts via part No.:

- Enter a complete part No., for example 984979.
