

VOLVO

Volvo Group

REPORT ON THE FIRST QUARTER 2016

- » In Q1 2016 net sales decreased by 4% to SEK 71.7 billion (74.8). Adjusted for currency movements and acquired and divested units sales decreased by 2%.
- » Operating income amounted to SEK 5,344 M compared with SEK 7,066 M, excluding restructuring charges of SEK 229 M in Q1 2015.
- » Operating income in Q1 2016 includes a capital gain of SEK 885 M from the sale of the external IT operation while operating income in Q1 2015 included a capital gain of SEK 2,471 M from the sale of shares in Eicher Motors Limited.
- » Adjusted for capital gains and restructuring charges (in 2015), operating income amounted to SEK 4,459 M (4,595), corresponding to an operating margin of 6.2% (6.1).
- » Currency movements had a negative impact of SEK 417 M on operating income.
- » Operating cash flow in the Industrial Operations was negative in an amount of SEK 10.4 billion (-1.7).

CEO'S COMMENTS

Maintained profitability on slightly lower sales

In the first quarter profitability was maintained thanks to a lower cost base and focus on adapting to changes in demand. This was despite slightly lower revenues. Sales amounted to SEK 71.7 billion, a decline of 4%, half of which was due to currency effects. Operating income totaled SEK 5.3 billion, representing an operating margin of 7.5%.

Truck markets are following the trend we have seen since last year. While truck deliveries declined 5% in total, we succeeded in improving our operating margin in the truck business to 7.8%. Demand in North America is slowing from high levels. In the first quarter, the organization did a good job in adjusting capacity for lower volumes. Volumes in South America decrease due to the already weak demand in Brazil. It will be some time before demand improves. Asia is showing a stable trend. The European market is performing strongly and order intake increased by 23%. We are pleased that both Volvo and Renault Trucks continue to grow. Volvo Trucks launched a number of product news in the construction segment.

Volvo CE's sales decrease marginally. Through a strong focus on profitable product segments and markets, we achieved the same margins as in the first quarter of last year. The market share continued to increase in the heavy segment. We launched several new products at Bauma, the leading trade fair in the construction industry. Most attention was focused on our new articulated hauler and our new excavator, both with load capacity increases that will generate significant productivity gains for customers and mean entry into new segments.

Sales developed well for Buses coming from strong order intake at the end of last year, and this trend has continued into the first quarter. Despite strong deliveries during the quarter, profitability was adversely impacted by currency effects.

Volvo Penta performed well during the first quarter, with increased sales and strong profitability.

Our financial services operation is an important part of our total offering. Earnings rose slightly compared with the year-earlier quarter, and return on equity was 13.5%.

During the quarter, we reported a capital gain of SEK 885 M from the divestment of parts of our IT operation. In the long term, the deal with HCL will also generate significant cost savings and allow the Volvo Group to concentrate the remaining IT competence around the core business.

As of this quarter, sales of services and spare parts are disclosed separately. This is an important part of our business, and in combination with our products they create tailor made customer solutions, greatly contributing to the profitability of our customers through increased availability, improved reliability and lower costs. Sales of services and spare parts, excluding financial services, accounted for 23% of net sales.

During the quarter we also implemented our new brand based organization for trucks with clear profit responsibility for each brand and business area. Furthermore a new governance model is implemented with the aim of further increasing customer focus, moving decisions closer to customers and securing clarity about our areas of improvement. Through continuous improvements we can create further efficiency in important areas such as quality, delivery precision and service offerings and thereby an improvement in customer satisfaction. This will step by step continue to improve the Group's profitability.

Martin Lundstedt
President and CEO

FINANCIAL SUMMARY OF THE FIRST QUARTER 2016

Net sales

In the first quarter of 2016, net sales for the Volvo Group decreased by 4% to SEK 71,707 M (74,788). The decrease is primarily an effect of the slowdown in the North American truck market, which was partly counterbalanced by improving demand for the Group's products in Europe. Adjusted for currency movements, net sales decreased by 2% compared with the previous year.

Vehicle sales (which comprises the sale of new vehicles, machinery and engines as well as the sale of used vehicles and machines, trailers, superstructures and special vehicles) decreased by 5%, primarily as a consequence of lower truck volumes in North and South America. Adjusted for currency movements vehicle sales decreased by 3% compared with the preceding year.

Service sales (comprising spare parts, maintenance and

service) decreased by 3%, primarily as a consequence of currency movements. Adjusted for currency movements, service sales were on the same level as last year.

Operating income

In the first quarter of 2016 operating income amounted to SEK 5,344 M including a capital gain from the divestment of the external IT business amounting to SEK 885 M.

Operating income in the first quarter of 2015 amounted to SEK 7,066 M excluding restructuring charges of SEK 229 M, but including a capital gain from the sales of shares in Eicher Motor Limited of SEK 2,471 M. Adjusting for above mentioned capital gains, operating income was SEK 4,459 M (4,595) corresponding operating margin of 6.2% (6.1).

Operating income was negatively impacted by lower net sales, costs for safety campaigns and production

adjustments in North America and unfavorable currency movements. This was partly off-set by lower R&D expenses as a consequence of higher capitalization as well as lower selling and administrative expenses related to the efficiency program.

The total impact on operating income from currency movements was unfavorable in an amount of SEK 417 M compared with the same quarter in the preceding year.

Operating income also includes a negative impact from costs for credit losses in China in amount of SEK 149 M in Volvo CE.

Also the first quarter last year included a negative impact of SEK 149 M in Volvo CE from a provision for expected credit losses in China.

Net financial items

Compared with the first quarter of 2015, net interest expense decreased primarily due to lower outstanding debt. Net interest expense amounted to SEK 387 M (501). Net interest expense in the fourth quarter of 2015 amounted to SEK 631 M.

In the first quarter of 2016 other financial income and expenses were positively impacted in an amount of SEK 487 M from realized result and unrealized revaluation of derivatives, compared with a negative impact of SEK 319 M in the first quarter of 2015.

Income taxes

In the first quarter 2016 the tax expense amounted to SEK 1,510 M (1,731), corresponding to a tax rate of 28% (29). The tax expense in the first quarter 2016 was negatively impacted by a changed tax rate in Japan.

Income for the period and earnings per share

In the first quarter 2016, income for the period amounted to SEK 3,789 M (4,236). Diluted earnings per share amounted to SEK 1.85 (2.09).

Operating cash flow in the Industrial Operations

In the first quarter of 2016, operating cash flow in the Industrial Operations was negative in an amount of SEK

10.4 billion. The negative cash flow is due to the normal seasonal build-up of working capital in the first quarter combined with an additional negative effect from reduced trade payables as a result of the reduction of truck production in North America.

Volvo Group financial position

At the end of the first quarter 2016, net financial debt, excluding provision for post-employment benefits, in the Industrial Operations amounted to SEK 8.4 billion, an increase of SEK 8.7 billion compared to the end of 2015 and equal to 10.7% of shareholders' equity. Including provisions for post-employment benefits, the Industrial Operations net financial debt amounted to SEK 24.2 billion which is equal to 31.0% of shareholders' equity. The increase is mainly explained by a negative operating cash flow of SEK 10.4 billion, remeasurements of the defined benefit pension obligations of SEK 2.2 billion, which was partly reduced by the divestment of the external IT operation within the Volvo Group. The increase in the defined benefit obligations is an effect of a decrease in the discount rates, mainly in the US and Sweden. During the first quarter the currency movements increased net financial debt by SEK 0.7 billion.

At the end of the first quarter 2016 the shareholders' equity in the Volvo Group amounted to SEK 88.4 billion compared to SEK 85.6 billion at year-end 2015. The equity ratio was 23.6% compared to 22.9% on December 31 2015. On the same date the equity ratio in the Industrial Operations amounted to 29.8% (28.6).

Number of employees

On March 31, 2016 the Volvo Group had 98,644 employees including temporary employees and consultants, which was a decrease of 857 employees compared with December 31, 2015 and 5,738 employees compared with a year ago.

TRUCKS

Lower volumes driven by correction in North America

- » Good demand in Europe, weakening in North America and continued low in Brazil
- » Production adjustments in Europe and North America executed
- » Slight improvement in underlying profitability – operating margin adjusted for capital gains on 7.8% (7.3)

Market development

In the beginning of 2016 truck demand has continued to develop favorably in Europe with an increase in registrations of 23% through February. Freight activity remained high, resulting in good capacity utilization of the truck fleet and good customer profitability. There is still some need for fleet renewal, which supports the expectation of growth in the European market in 2016.

The total North American retail market for heavy-duty trucks decreased by 7% in the first quarter of 2016. The correction in the North American market, primarily in the long-haul segment, continued. A strengthened construction segment, low fuel prices and low interest rates support the market, but with stagnant freight volumes, increased availability of competitively priced

used trucks and less need for fleet renewal, the market is expected to settle on a more normalized level during 2016.

In Brazil registrations declined by 27% in the first quarter from already low levels. With a continued contracting economy and low business confidence, the Brazilian market is expected to continue to slow down during 2016.

In India registrations of heavy-duty trucks increased by 35% in the first quarter 2016, driven by good economic activity and a continued good business confidence.

The Chinese total market for medium- and heavy-duty trucks increased by 9% in the first quarter of 2016.

In Japan, demand remained healthy in the first quarter although registrations of medium- and heavy-duty trucks decreased somewhat compared to the same quarter last year.

Orders and deliveries

Total net orders decreased by 12% in the first quarter compared with the first quarter last year while deliveries declined by 5%.

Orders in Europe rose by 23% with a continued positive trend for both Volvo and Renault Trucks. Production in Europe has been adjusted in order to meet the increase in demand and deliveries rose by 16%.

In North America orders were down 54% compared to the same quarter last year and deliveries came down by 33% in total. The decline in both orders and deliveries is an effect of the market correction with dealers focusing on reducing their inventories as well as a result of the comparison with an extraordinarily high quarter last year for both orders and deliveries. The production rates in the Group's North American production system were reduced

in the quarter to meet the lower demand and allow for inventory reduction at dealers.

Orders in South America declined by 9% as a consequence of the further deterioration in the Brazilian market. In addition to the major adjustments made last year to the Group's production system in Brazil, actions were taken in the quarter to adapt production to the weaker demand.

In Asia orders decreased by 15%, with the same pattern for all brands, reflecting soft demand in many parts of the region, including the Middle East. Deliveries on the other hand were slightly higher compared to the same quarter last year.

¹Excluding restructuring charges in 2015. For more information, please see note 6.

Net sales and operating income

During the first quarter of 2016, the truck operation's net sales amounted to SEK 48,037 M, which was 7% lower than the first quarter last year. The decrease in sales was mainly driven by North America, South America, Africa and Oceania. Adjusted for currency movements, net sales decreased by 5%. Service sales amounted to SEK 12,060 M, which was almost flat when adjusted for currency impact in the quarter.

Operating income in the first quarter 2016 amounted to SEK 3,741 M compared with SEK 6,246 M in the same quarter last year, excluding restructuring charges of SEK 127 M but including a capital gain of SEK 2,471 M from the sale of shares in Eicher Motors Limited. Adjusted for the capital gain, operating income in the first quarter 2015 was SEK 3,775 M. In the first quarter of 2016 the operating margin amounted to 7.8% compared with 7.3% in the first quarter for 2015 when adjusted for the capital gain.

Earnings were positively impacted by lower selling and administrative expenses as a consequence of the efficiency program as well as lower R&D expenses as a consequence of higher capitalization compared to the same quarter last year. Lower volumes, unfavorable currency movements and costs for safety campaigns had a negative impact on earnings.

Compared with the first quarter of 2015 currency movements had a negative impact of SEK 340 M.

Events in the quarter

Volvo Group participated in the EU Truck Platooning Challenge, with very positive reactions from decision-makers, politicians and the general public. Three Volvo trucks drove closely behind one another using wireless communication, in a platoon, from Göteborg, Sweden to Rotterdam, the Netherlands with the purpose of highlighting the changes required in European transportation legislation to facilitate the introduction of platooning.

In North America, Volvo Trucks launched several new integrated powertrain solutions including new engine features, offering increased fuel efficiency, productivity, reliability and more efficient chassis packaging.

Volvo Trucks also launched a new transmission, Volvo I-shift with crawler gears, ideal for applications requiring a slow speed and maneuverability and with the ability to start off from standstill with up to 325 tons of cargo.

CONSTRUCTION EQUIPMENT

Improvement in Europe, continued uncertainty in emerging markets

- » Sales and profitability on the same level as last year – operating margin of 2.7% (2.8)
- » Strong interest in products and services launched at the Bauma trade show
- » Continued market share gains on large machines

Market development

The construction equipment industry continued to decline in a number of major markets, in particular the Middle East and Latin America. The European market is showing positive growth. In the quarter, the European market was up by 6% compared to the same period last year. This was mainly driven by a significant recovery in the important French market (+55%). This growth was tempered by a slowdown in the UK market, as well as further decline in the Russian market, from already low levels in 2015.

The North American market remained stable. A decline in the sales of larger general purpose machines was partially offset by growth in the sale of compact equipment machines.

The decline in South America, especially Brazil, continued in the first quarter due to a weak economy and low overall business confidence.

The Chinese market started the year with very weak demand but gained momentum towards the end of the quarter, much driven by a pre-buying ahead of new emission rules effective April 1. Through March the market for the two product categories wheel loaders and excavators increased by 8%.

The Asian (excluding China) total market was 5% below last year. This was mainly driven by Japan, Korea and Southeast Asia. However the Indian market continued to grow strongly.

Orders and deliveries

Net order intake was 11% below the first quarter 2015 with a decline for Volvo, which was partially off-set by an increase for SDLG due to the pre-buy in China. The year-over-year comparison is influenced by the unusually large order intake for Volvo branded backhoe loaders, motor graders and milling machines last year, when it was announced that these machines were to be discontinued. Excluding these product exits, order intake was 4% below last year.

In Europe, order intake was 5% below the same quarter last year. However, excluding the impact of the product exits, it was 9% above last year due to good order intake in France and Germany.

Order intake in North America was 7% below the first quarter last year. This was mainly driven by the declining market for large machines, in which Volvo has a strong position.

Total market development	Year-to-date Feb.		
	2016	Forecast 2016	Previous forecast
Change in % measured in units			
Europe	6	0% to +10%	-5% to +5%
North America	-2	-10% to 0%	-10% to 0%
South America	-40	-20% to -10%	-10% to 0%
Asia excl. China	-5	-10% to 0%	-10% to 0%
China ¹	-17	-15% to -5%	-20% to -10%

¹Through March, the Chinese market for wheel loaders and excavators increased by 8%.

Net order intake per market	First quarter		Change in %
	2016	2015	
Number of construction equipment			
Europe	3,983	4,195	-5
North America	1,683	1,818	-7
South America	147	982	-85
Asia	6,738	7,096	-5
Africa and Oceania	539	601	-10
Total orders	13,090	14,692	-11
Of which:			
Volvo	8,544	10,805	-21
SDLG	4,510	3,887	16
Of which in China	3,999	3,135	28

In South America order intake was 85% below last year. This was driven by continued strong market decline, especially in Brazil.

Order intake in Asia (including China) was 5% below last year. This was caused by market declines in Korea and Southeast Asia, which was partly off-set by the pre-buying in China.

In the first quarter deliveries increased by 2% compared to the same period in 2015, mainly driven by increased sales in Europe. Deliveries in Europe were 24% above last year. This was mainly driven by higher sales in France, Germany and Scandinavia as well as market share gains.

Deliveries in North America decreased by 3% compared to the same period last year. However, when the product exits from 2015 are excluded, they were 3% higher than last year. Additionally, sales of larger more profitable products were above last year despite the decline in the market.

In South America deliveries continued to decrease significantly in the first quarter (-70%), mainly because of lower market demand in the area, and especially in Brazil.

In Asia (including China) deliveries were 2% above last year. This was driven by increased sales of SDLG branded machines in China ahead of new emissions regulations effective April 1. Volvo branded sales in the region were below last year as a result of low market demand.

Net sales and operating income

In the first quarter net sales decreased by 2% to SEK 12,452 M. Adjusted for currency fluctuations net sales

were flat compared with the first quarter last year.

Net sales of machines decreased by 2%. The overall market situation in Brazil and Russia remains difficult, partly offset by strong performance in Northern Europe. Adjusted for currency movements, net sales of machines were flat compared with Q1 2015. Service sales decreased by 5%, driven mainly by currency and low machine utilization in China. Adjusted for currency movements service sales decreased by 1%.

Operating income amounted to SEK 341 M compared with SEK 352 M excluding restructuring charges of SEK 75 M in Q1 2015, corresponding to an operating margin of 2.7% (2.8). Lower operating expenses were off-set by negative brand and product mix as well as negative currency movements in an amount of SEK 49 M. Earnings were also negatively impacted by costs for credit losses in China of SEK 149 M.

Also in the first quarter of 2015 operating income was negatively impacted by provisions for expected credit losses in China in an amount of SEK 149 M.

Events in the quarter

The start of the year saw Volvo CE celebrating the 50th anniversary of articulated hauler production. It also saw the unveiling a host of new products for 2016 at the Bauma trade show in Munich, Germany, including the A60H articulated hauler and the EC950E excavator – by far the largest machines of these types the company has ever introduced.

BUSES

Good sales momentum

- » Order intake improved by 13%
- » Operating income SEK 59 M (104)
- » Order for 11 electric hybrid buses to Namur, Belgium

The European bus market improved somewhat during the first two months of 2016. In North America there is a positive development, while in Brazil the negative economic development continues to impact demand for buses and coaches. The Asian markets are recovering gradually, including the Indian bus and coach market.

Order intake in the first quarter increased by 13% mainly driven by a good development in Europe. Major orders in the quarter were 200 units to Egypt, 130 Volvo 9800 coaches to Mexico and 80 buses to Ecuador. Volvo Buses also received an order for 11 electric hybrid buses and 2 electric bus charging stations to the city of Namur in Belgium. The charging stations will be supplied by ABB. This is the largest order to date for the company's electric bus system.

Bus deliveries increased by 28% in the first quarter of 2016, driven by North America and Asia.

Net sales increased by 11% to SEK 5,258 M (4,748). Adjusted for currency fluctuations, sales increased by 14% compared with the same period 2015.

Vehicle sales increased by 13% mainly due to increased sales in Asia and North America. Adjusted for currency movements vehicle sales increased by 16%. Service sales increased by 1%. Adjusted for currency movements service sales increased by 6%.

Buses reported an operating income of SEK 59 M (104). The operating margin was 1.1% (2.2). The positive effects from higher volumes could not fully off-set a negative currency development. Compared with the first quarter of 2015, operating income was negatively impacted by currency movements in an amount of SEK 141 M.

VOLVO PENTA

Increased profitability

- » Positive sales growth continues in most segments
- » Operating margin of 15.6%
- » Launch of updated Glass Cockpit system at Miami Boat Show

The marine leisure market remains flat. In February, Volvo Penta launched an upgraded Glass Cockpit System, which encompasses the latest navigational technology from Garmin and Volvo Penta's Electronic Vessel Control system (EVC) to provide a single interface for monitoring and controlling engine and navigation data.

The marine commercial market is lingering on low levels, but shows positive signs in certain sub-segments, such as wind farming vessels.

For industrial off-road engines, the market is fragmented, showing mixed signs within certain sub-segments. The markets in Brazil, Russia, and China continue to decline. The market for industrial power generation engines shows a positive annual growth rate with a stable development in the Middle East and the export-oriented European market.

Net order intake during the first quarter was 9,974 units, which was 11% lower than last year driven by lower demand for marine gasoline and industrial genset engines.

In the quarter a total of 9,279 engines were delivered, an increase of 1% compared with the preceding year.

Net sales increased by 4% to SEK 2,340 M (2,250). Adjusted for currency movements, net sales increased by 6%.

Net sales of engines increased by 4% driven by higher volumes and a positive product mix. Adjusted for currency the increase was 6%. Net sales of services increased by 5% driven by higher volumes. Adjusted for currency the increase was 7%.

Operating income amounted to SEK 366 M compared with SEK 292 M excluding restructuring charges of SEK 16 M in the first quarter of 2015. The operating margin was 15.6% (13.0). Earnings were positively impacted by higher sales, a good product mix and somewhat lower operating expenses. Compared with the first quarter of 2015, operating income was impacted negatively by currency movements in an amount of SEK 7 M.

FINANCIAL SERVICES

Strong performance

- » Record new business volumes
- » Continued good portfolio performance
- » Improved profitability

Volvo Financial Services (VFS) had record first quarter new business volume and improved penetration as good results in North America and most of Europe outweighed weak demand in Brazil, China and Russia. Adjusted for currency, the credit portfolio grew by 5% compared with the same quarter 2015.

The portfolio continued to perform well during the quarter, highlighted by low customer overdues in most markets. The Brazil portfolio continues to be negatively impacted by the economic downturn and activities are in place to mitigate the negative effects.

Operating income in the first quarter 2016 improved to SEK 493 M (474) driven primarily by lower credit losses which were partially offset by unfavorable currency movements.

In January, VFS successfully completed an asset-backed securitization program. Under the terms of the transaction, SEK 5.6 billion of securities tied to US-based loans on trucking and construction equipment assets were issued. In addition, SEK 1.2 billion of assets was syndicated in the quarter, effectively reducing concentration risks and freeing up credit capacity to support sales.

IMPORTANT EVENTS

New truck organization

On January 27, it was announced that the Volvo Group had decided to introduce a brand-based organization with clearer commercial accountability for the Group's various truck brands. Five separate units were to be created: Volvo Trucks, UD Trucks, Renault Trucks, Mack Trucks, and Value Truck & JV:s, each with profit and loss responsibility for their respective business. The new organization came into effect on March 1, 2016. Thereafter, the Volvo Group comprises ten business areas: Volvo Trucks, UD Trucks, Mack Trucks, Renault Trucks, Value Truck & JV:s, Volvo Construction Equipment, Volvo Buses, Volvo Penta, Governmental Sales and Volvo Financial Services.

Volvo completed sale of IT operation

On March 31, the Volvo Group completed the sale of its external IT operation and related assets and the outsourcing of its IT infrastructure to HCL Technologies. The transaction gave a capital gain of SEK 885 M, which had a positive impact on the operating income in the first quarter of 2016.

Annual General Meeting of AB Volvo

The Annual General Meeting of AB Volvo held on April 6, 2016, approved the Board of Directors' motions that a

dividend of SEK 3.00 per share be paid to the company's shareholders.

Matti Alahuhta, Eckhard Cordes, James W. Griffith, Kathryn V. Marinello, Martina Merz, Hanne de Mora, Carl-Henric Svanberg and Lars Westerberg were reelected as members of the Board. Martin Lundstedt, Håkan Samuelsson and Helena Stjernholm were elected as new members of the Board. Carl-Henric Svanberg was reelected as Chairman of the Board.

Bengt Kjell, representing AB Industrivärden, Lars Förberg, representing Cevian Capital, Yngve Slyngstad, representing Norges Bank Investment Management, Pär Boman, representing Handelsbanken, SHB Pension Fund, SHB Employee Fund, SHB Pensionskassa and Oktogonen, and the Chairman of the Board were elected members of the Election Committee.

A remuneration policy for senior executives was adopted in accordance with the Board of Directors' motion.

Detailed information about the events is available at www.volvogroup.com

NOTE 1 | ACCOUNTING PRINCIPLES

The Volvo Group applies International Financial Reporting Standards (IFRS) as endorsed by the EU. The accounting principles adopted are consistent with those described in the Volvo Group Annual Report 2015 note 1 (available at www.volvogroup.com). There are no new accounting principles applicable from 2016 that significantly affects the Volvo Group.

This interim report has been prepared in accordance with IAS 34 Interim Financial Reporting and the Swedish Annual Accounts Act.

The parent company applies the Swedish Annual Accounts Act and RFR 2 Reporting for legal entities.

NOTE 2 | RISKS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

All business operations involve risk – managed risk-taking is a condition of maintaining a sustained favorable profitability. Risk may be due to events in the world and can affect a given industry or market. Risk can be specific to a single company. Volvo works continuously to identify, measure and manage risk, and in some cases Volvo can influence the likelihood that a risk-related event will occur. In cases in which such events are beyond Volvo's control, the aim is to minimize the consequences.

The risks to which the Volvo Group is exposed are classified into three main categories:

External-related risks – such as the cyclical nature of the commercial vehicles business, intense competition, changes in prices for commercial vehicles and government regulations;

Financial risks – such as currency fluctuations, interest levels fluctuations, valuations of shares or similar instruments, credit risk and liquidity risk and;

Operational risks – such as market reception of new products, reliance on suppliers, protection and maintenance of intangible assets, complaints and legal actions by customers and other third parties and risk related to human capital.

For a more elaborate account of these risks, please refer to the Risk Management section on pages 107-109 in the Volvo Group Annual Report 2015 (available at www.volvogroup.com).

Risk updates for the period

Short-term risks, when applicable, are also described in the respective segment section of this report.

An increase in demand could potentially result in delivery disturbances due to suppliers' financial instability or shortage of resources.

Uncertainty regarding customers' access to the financing of products in emerging markets might have a negative impact on demand.

Volvo verifies annually, or more frequently if necessary, the goodwill value of its business areas and other intangible assets for possible impairment. The size of the surplus value differs between the business areas and they are, to a varying degree, sensitive to changes in the business environment. Instability in the business recovery and volatility in interest and currency rates may lead to indications of impairment.

The reported amounts for contingent liabilities reflect a part of Volvo's risk exposure. Total contingent liabilities as of March 31, 2016, amounted to SEK 15.2 billion compared to SEK 15.6 billion as of December 31, 2015. The gross exposure of SEK 15.2 billion is partly reduced by counter guarantees and collaterals. The contingent liabilities for credit guarantees for construction equipment in China have decreased. However, including both contingent liabilities and on-balance sheet exposure the credit risk is still significant, and in the first quarter of 2016 an additional cost for credit losses of SEK 149 M was recognized. The other significant part is related to tax claims. No major changes have occurred in this matter in the first quarter 2016.

Please refer to the Volvo Group Annual Report 2015 note 21 and note 24 for descriptions of the nature of provisions and contingent liabilities for legal proceedings and investigations, including information on legal proceedings and investigations that the Group is currently involved in and subject to.

NOTE 3 | CORPORATE ACQUISITIONS AND DIVESTMENTS

Acquisitions and divestments

Volvo completed the sale of its external IT operation and related assets and the outsourcing of its IT infrastructure during the first quarter. The divestment resulted in a positive effect on operating income and net financial debt of SEK 885 M.

Volvo has not made any other acquisitions or divestments during the first quarter that have had a significant impact on the Volvo Group.

Assets and liabilities held for sale

At the end of the first quarter assets amounting to SEK 2,697 M and liabilities amounting to SEK 377 M are classified as held for sale. This mainly pertains to the planned divestment of the North American used truck business, Arrow Truck Sales.

NOTE 4 | CURRENCY AND FINANCIAL INSTRUMENTS

Fair value of financial instruments

Valuation principles and principles for hedge accounting for Volvo Group financial instruments, as described in Volvo Group Annual Report 2015 Note 30 (available at www.volvogroup.com), have been consistently applied throughout the reporting period.

Financial instruments in the Volvo Group reported at fair value through profit and loss consist mainly of marketable securities (see balance sheet) and interest-, currency- and raw material derivatives. Derivatives with positive fair values amounted to SEK 3.5 billion and derivatives with negative fair values amounted to SEK 1.3 billion as of March 31, 2016. The derivatives are accounted for on

gross-basis, with the exception of derivatives with positive fair values amounting to SEK 0.5 billion, netted against a fair value of a loan of negative SEK 0.5 billion, related to hedge accounting.

Financial liabilities valued at amortized cost, reported as Current and non-current bond loans and other loans, amounted to SEK 136.2 billion in reported carrying value with a fair value of SEK 138.5 billion. In the Volvo Group consolidated financial position, financial liabilities include loan-related derivatives with negative fair values amounting to SEK 0.7 billion.

AB Volvo (publ) is obliged to disclose the information provided herein pursuant to the Securities Markets Act and/or the Financial Instruments Trading Act. The information was submitted for publication at 07.20 a.m. April 22, 2016.

This report contains forward-looking statements that reflect the Board of Directors' and management's current views with respect to certain future events and potential financial performance. Although the Board of Directors and the management believe that the expectations reflected in such forward-looking statements are reasonable, no assurance can be given that such expectations will prove to have been correct. Accordingly, results could differ materially from those set out in the forward-looking statements as a result of, among other factors, (i) changes in economic, market and competitive conditions, (ii) success of business and operating initiatives, (iii) changes in the regulatory environment and other government actions, (iv) fluctuations in exchange rates and (v) business risk management.

This report does not imply that the Company has undertaken to revise these forward-looking statements, beyond what is required under the company's registration contract with Nasdaq Stockholm, if and when circumstances arise that will lead to changes compared to the date when these statements were provided.
